PREFACE.

This volume is issued under the directions contained in the Government of India, Home Department, letter No. 3375, dated the 1st of October 1902. The lines on which the revision of District Gazetteers is to be undertaken are there laid down as follows :—

The chief difficulty which stands in the way of the periodical revision of the existing Gazetteers, and that reason which has caused so large a portion of their contents to become obsolete, is that they contain a mixture of permanent matter, such as that relating to the history, physical characteristics, religion, ethnography, &c., of the district; of matter which changes gradually but, as a rule, slowly, such as that dealing with the agricultural and economic conditions; and of ephemeral matter, mainly statistical, which soon becomes out of date. For this reason, when a new District Gazetteer is issued it should consist of two volumes, A and B, compiled on the following lines—

(1) "In the first edition all descriptive matter should go into the A volume; but the volume should contain only such general figures (incorporated in the letter-press) as are necessary to give point to remarks in the text. . . . All detailed statistics should be relegated to the B volume, which would, at first, consist only of these and of such notes as may be necessary to elucidate them.

(2) "On the occasion of the next revision the statistics in the B volume should be re-compiled, and this volume should be expanded by adding to it any matter that might be required to correct or supplement the A volume. Thus if there had been a famine since A was published, if a new railway had been opened, and so forth, information on these points would appear in B as supplementary to the appropriate chapters in A.

(3) "This process would go on till the time had come for revising the A volume. Then all the supplementary text matter should be incorporated in the new A volume, and B would revert to its original form as a statistical appendix with explanatory notes.

(4) "A new edition of the B volume should be brought out after each census. The revision of the A volume must be left to the discretion of the Local Governments. The occurrence of a new settlement will ordinarily be the best time for such revision;* but it may well happen that plenty of copies of the original A volume are still available, and that the settlement and lapse of time have not wrought any important change in the conditions of the district. In that case the revision of A should stand over till the stock of it no longer suffices for the demand; but a brief account of the settlement operations, and of the changes which they have produced or disclosed in the state of affairs, described in the A volume, should be prepared by the Settlement Officer before he is relieved of his duties for inclusion in the next decennial B volume.

(5) "The statistical part of the B volume should be issued with inter-leaved blank pages, so that those who use it can have the figures of later years written in. The tables included in the B volume should be drawn up on uniform lines, and should contain the main administrative statistics of the district and its tahsils or other sub-divisions. . . . It is thought that including the explanatory notes they should not ordinarily exceed a maximum limit of 50 pages."

Instead of issuing the tables with interleaved blank pages as suggested in para. (5) above, it has been found convenient to print the tables themselves with blank spaces in which to insert the figures of future years. The pages occupied by the statistical matter thus include the space which in the original scheme would have been appropriated by the interleaved pages, and consequently are in excess of the maximum fixed in para. (5).

Punjab Government letter No. 434 (Home—General) of the 6th March contains the following further instructions and remarks on this subject :—

1. In accordance with the orders quoted above the preparation of a revised edition of Part B of all the District Gazetteers will now be undertaken. In order that it may be completed with the greatest possible despatch, the revision of each volume will be entrusted to the District Officer concerned, who, in most of the larger districts, will find it possible to put an Assistant Commissioner in charge of the work. The revision should not involve much trouble or expenditure of time, as the necessary information (except in so far as the census tables are concerned) for the years from 1901-02 onwards will be readily obtainable from the annual reports on the various subjects for which statistics are required. It ought not, therefore, be difficult to produce an up to date copy of the existing Volume B for each district with manuscript figures, for all the tables, except the census ones, from the date of the last compilation up to the year 1910-11, if not up to the year 1911-12, by the time the new census statistics are ready. I am accordingly to request that the necessary arrangements may be made for the compilation of this work by the 30th June next, by which date the required census figures will, it is understood, be available for incorporation in the volume. The annual statistics under each head should be given in detail for the years 1901-02 to 1910-11 (and for 1911-12 if available) inclusive, and blank spaces should be left for the 10 succeeding years as in the existing volumes. For the year up to and including, 1900-01 all available statistics should be given in quinquennial averages in order that the development of the district may be readily ascertainable.
2. The statement forwarded with this letter shows in detail how far figures will be available for the census tables in Part B and the sources from which they can be obtained. As to the tables referred to therein under head A, the Superintendent, Census Operations, will be directed to give District Officers such information and assistance as may be necessary.
3. With regard to the printing of the revised volumes, I am to say that the detailed arrangements will be in the hands of the Director of Land Records, who will undertake the placing of a suitable contract and be responsible that uniformity is observed. But each District Officer will be responsible for correcting the proof of his own volume.
4. In conclusion, I am to add that the Lieutenant-Governor hopes that all District Officers will readily co-operate in completing the revision without unnecessary delay, so that the Punjab may, if possible, be furnished with a complete set of up to date statistical tables for each district within a year's time. The sub-division of responsibility in labour indicated above will, it is hoped, result on this occasion in the production of a new edition of Part B of the Gazetteer of uniform date throughout the Province.

---

* In the Punjab the Settlement Officer is generally entrusted with the revision of the District Gazetteer, and this plan is commended for adoption in other Provinces.
